Drying: Using high-powered dehumidifiers and air movers to eliminate residual moisture. 5. Reconstruction: Repairing or replacing damaged structures and materials. 6. Rapid recognition involves visual inspections and moisture detection tools such as infrared cameras and moisture meters. Early detection is crucial to prevent mold growth and structural deterioration. Once identified, immediate response actions include: - Shutting off water sources - Removing valuables from affected areas - Securing the property to prevent further intrusion

Water Extraction and Drying

Specialized industrial-grade equipment is employed: - Submersible Pumps and Wet Vacuums: For removing large volumes of standing water. - Air Movers and Dehumidifiers: To facilitate evaporation and moisture removal from materials.
