What Are Fake Blood Work Papers for Pregnancy?

Fake blood work papers for pregnancy are counterfeit documents designed to mimic official medical reports indicating pregnancy-related blood tests. These papers typically replicate the appearance of genuine blood test results, including lab logos, patient information, test dates, and results for markers such as hCG (human chorionic gonadotropin), progesterone levels, or other pregnancy-related indicators.

Common Features of Fake Pregnancy Blood Work Papers

2. Patient details such as name, age, and test date
3. Test results with normal, elevated, or "positive" indicators for pregnancy
4. Barcodes or QR codes that seem authentic
