Early Foundations

The roots of competence modeling trace back to the work of David McClelland in the 1970s, who challenged traditional intelligence testing by emphasizing "competencies"—the underlying characteristics that differentiate superior performers from average ones. McClelland's pioneering research underscored that competencies are predictive of job success beyond IQ or technical skills alone.

Competency-Based Human Resource Management

Building upon McClelland’s insights, organizations began adopting competency-based HR practices, leading to the development of formal models. These models became integral to: - Employee selection - Leadership development - Succession planning

Modern Theoretical Frameworks

Contemporary competence models are often informed by: - Behavioral Event Interviewing (BEI): Focuses on past behaviors as indicators of future performance - Psychometric Assessments: Quantify competencies through validated tools - 360-Degree Feedback: Incorporates multiple perspectives to evaluate behavioral competencies

Types of Competence at Work Models

Various models have been developed to suit different organizational needs and contexts. Below are some of the most influential and widely adopted models.

Generic Competency Models

These models identify broad competencies applicable across multiple industries and roles, such as: - Communication skills - Problem-solving abilities - Teamwork - Adaptability - Initiative Example: The European Competence Framework (ECCF) encompasses a set of core competencies relevant across sectors.

Role-Specific Competency Models
