Sample Midwifery MCQs with Answers

Below are some representative MCQs across different categories, accompanied by detailed explanations.

1. Antenatal Care

Q1: Which of the following is the most appropriate time to perform a first-trimester ultrasound for dating pregnancy? a) 6 weeks gestation b) 8-10 weeks gestation c) 12 weeks gestation d) 20 weeks gestation Answer: b) 8-10 weeks gestation

Explanation: The optimal window for a first-trimester ultrasound for accurate dating is between 8 and 10 weeks gestation, when the crown-rump length measurement is most reliable. Earlier scans (around 6 weeks) might be less accurate due to very early gestational development, while later scans are better suited for anomaly detection.

2. Intrapartum Care

Q2: Which fetal heart rate pattern is most indicative of fetal distress? a) Baseline rate of 140 bpm with moderate variability b) Baseline rate of 160 bpm with accelerations c) Baseline rate of 120 bpm with late decelerations d) Baseline rate of 130 bpm with early decelerations Answer: c) Baseline rate of 120 bpm with late decelerations Explanation: Late decelerations, especially when persistent, are associated with uteroplacental insufficiency and fetal hypoxia, indicating fetal distress. The baseline rate of 120 bpm is slightly below the normal range, further raising concern.

3. Postpartum Care

Q3: Which of the following is the most common cause of postpartum hemorrhage? a) Retained placenta b) Uterine atony c) Placental abruption d) Vaginal tears Answer: b) Uterine atony Explanation: Uterine atony, where the uterus fails to contract effectively after delivery, is responsible for approximately

70-80% of postpartum hemorrhage cases. Proper uterine massage and administration of uterotonics are primary interventions.

4. Neonatology

Q4: A newborn is born with a respiratory rate of 70 breaths per minute, grunting, and nasal flaring. What is the most probable diagnosis? a) Neonatal sepsis b) Neonatal hypoglycemia c) Neonatal respiratory distress syndrome d) Neonatal jaundice Answer: c) Neonatal respiratory distress syndrome Explanation: The signs described—tachypnea, grunting, nasal flaring—are characteristic of respiratory distress. Neonatal respiratory distress syndrome is common in preterm infants due to surfactant deficiency.

5. Professional Practice & Ethics

Q5: When providing informed consent for a procedure, the midwife must ensure that the patient: a) Understands the procedure and its risks b) Agrees without questions c) Signs the consent form immediately d) Is coerced to consent to avoid delays Answer: a) Understands the procedure and its risks Explanation: Ethical practice requires that informed consent be based on the patient's understanding of the procedure, its benefits, risks, and alternatives. Coercion or inadequate information undermine autonomy and professionalism.

When readers know they can return at any

time, they feel less urgency to understand everything immediately. Ideas settle through repetition and reflection, leading to deeper comprehension. Global availability adds perspective. Readers from different regions engage with the same material, often bringing varied interpretations. This shared access broadens understanding and highlights the value of multiple viewpoints. Exploration becomes natural when effort is minimal. Readers venture beyond familiar subjects, connecting ideas across disciplines. This openness strengthens creativity and encourages critical thinking. Long-term engagement is supported by continuity. Notes saved today remain relevant tomorrow. Bookmarks placed months ago still guide attention. Learning evolves instead of resetting. Books take on a different role. They become resources that wait rather than demand. They remain present, ready to support new questions and changing interests. Over time, this steady availability shapes attitude. Learning feels approachable. Curiosity feels justified. Understanding feels earned through consistency rather than urgency. Accessing **Midwifery Mcqs With Answers** in this way aligns with real-life rhythms. It respects limited time, varied attention, and changing priorities. Learning becomes something that accompanies daily life rather than competing with it. Rather than pushing toward a finish line, the experience encourages return. Each revisit brings new context and deeper insight. Familiar sections reveal new meaning as perspective shifts. Knowledge grows quietly through this process. There is no

dramatic endpoint, only gradual accumulation. Ideas connect, understanding strengthens, and confidence develops naturally. In this space, learning does not announce itself.
