Sample PADI Rescue Diver Exam Questions with Answer Key

Below, we analyze some typical questions, providing detailed explanations and reasoning for each correct answer.

Question 1: Recognizing Diver Stress

Question: During a dive, you notice a fellow diver is swimming erratically, appears confused, and is hyperventilating. What is the most appropriate immediate action? - A) Ignore the diver; they are fine. - B) Signal the diver to ascend immediately. - C) Approach calmly, establish communication, and encourage

the diver to rest. - D) Call emergency services right away. Answer: C) Approach calmly, establish communication, and encourage the diver to rest. Explanation: Erratic swimming, confusion, and hyperventilation are signs of diver stress or panic. The best immediate response is to approach calmly, establish communication, and reassure the diver. Forcing an ascent (B) may exacerbate panic, and ignoring the signs (A) is dangerous. Calling emergency services (D) is premature unless the situation worsens.

Question 2: Assisting a Panicked Diver

Question: A diver showing signs of panic begins to ascend rapidly toward the surface. You are nearby. What is the best rescue approach? - A) Grab the diver firmly and pull them to the surface. - B) Use a controlled, calm approach to guide them back down or to the surface slowly. - C) Wait for them to reach the surface and then assist. - D) Signal other divers to help, then leave the scene. Answer: B) Use a controlled, calm approach to guide them back down or to the surface slowly. Explanation: Panicked divers often ascend too quickly, risking decompression sickness and other injuries. The rescue should involve a controlled, calm approach to defuse panic, prevent rapid ascent, and bring the diver to safety without causing additional stress or injury. Grabbing forcefully (A) may escalate panic. Waiting (C) delays assistance, and leaving the scene (D) neglects rescue duties.

Question 3: Handling an Unresponsive Diver

Question: You find a diver unconscious underwater. After ensuring the scene is safe, what is your first action? - A) Remove the diver from the water immediately. - B) Perform rescue breaths while still underwater. - C) Bring the diver to the surface and begin rescue breaths on the surface. - D) Call for emergency medical services and wait. Answer: C) Bring the diver to the surface and begin rescue breaths on the surface. Explanation: The priority is to safely bring the diver to the surface while maintaining control of the rescue. Once at the surface, assess responsiveness and begin rescue breaths if unresponsive. Removing the diver underwater (A) is risky and unnecessary if you can bring them to the surface safely. Performing rescue breaths underwater (B) is not effective and potentially dangerous. Calling emergency services (D) is essential but comes after initial rescue steps.

Question 4: Oxygen Administration in Emergencies

Question: During a rescue, you notice the victim is breathing but appears to be unconscious. What is the most appropriate oxygen procedure? - A) Do nothing; they are breathing. - B) Administer 100% oxygen via a mask or regulator. - C) Wait until they regain full consciousness before administering oxygen. - D) Use only a nasal cannula to supply oxygen. Answer: B) Administer 100% oxygen via a mask or regulator. Explanation: Providing oxygen can reduce the effects of hypoxia and improve recovery chances, especially in unconscious victims. Even if breathing is present, unconscious individuals benefit from supplemental oxygen. Waiting (C) delays critical aid, and nasal cannulas (D) may not provide sufficient oxygen in emergency situations.

One of the simplest and most effective methods of organization is using clearly labeled folders. Including details such as title, author, version, and date can make files easier to identify at a glance. For collections involving multiple volumes or editions, version control is essential. Keeping track of revisions ensures that you always know which version is the most current or authoritative. You can use version numbers in file names or create a separate folder for archived editions. This practice is especially important for academic, technical, or professional Padi Rescue Diver Exam Questions With Answer Jiuguiore materials that may be updated regularly.
